

Testing Hydrogen admixture for Gas Applications

Invitation to the 1st Workshop of the THyGA project

Wednesday, May 6, 2020: 10:00/12 AM and 1:00/3:00 PM (CEST)
incl. virtual lunch break

The objectives are to share first results of the project:

- Insight on THyGA's first research contents
- EU market segmentation of gas appliances
- Focus topic: development of a protocol for testing H₂ admixture
- Discussion of the testing procedure of gas appliances with manufacturers, researchers and associations
- Discussion and questions related to the addressed topics

Given the covid-19 situation, the workshop will be organized as a web conference. Details will be given in beginning of May.
